

Abhijeet Maske

Technical Product Owner | SaaS Product Leader | CSPO Certified | Product Strategy & Roadmap | AI-Enabled Platforms

[E-Mail: Abhijeet.maske@yahoo.com](mailto:Abhijeet.maske@yahoo.com) | Mobile: +91-8484944797 | Pune, India

PROFESSIONAL SUMMARY

- SaaS Product Leader with 9+ years of experience driving 0→1 and scale (1→N) product growth across multi-product platforms
- Scaled a SaaS ecosystem from 4 to 22 products, improving adoption (+25%), onboarding speed (+30%), and operational efficiency
- Certified Scrum Product Owner (CSPO) with strong expertise in Agile product ownership, backlog prioritization, and stakeholder alignment
- Proven ability to translate business needs into scalable product solutions that drive adoption, efficiency, and measurable business outcomes
- Driving AI-led product innovation and intelligent automation to improve business outcomes and customer experience
- Experienced in managing complex, multi-stakeholder SaaS environments with a strong focus on scalability and product outcomes

PORTFOLIO HIGHLIGHTS

- Built and scaled a multi-product SaaS platform ecosystem (4 → 22 products)
- Managed 26+ enterprise clients, driving product adoption and long-term customer value
- Delivered enterprise solutions aligned with business outcomes and operational efficiency
- Owned end-to-end product lifecycle (discovery → delivery → optimization → scaling) with focus on business impact and product adoption

CORE COMPETENCIES

- **Product Strategy & Ownership:**
 - Product Strategy, Roadmap Planning, Product Lifecycle Management
 - Feature Prioritization, Customer Discovery, KPI Definition
 - Product Metrics, Adoption & Growth Strategy, Product Analytics
 - Product Experimentation, A/B Testing
- **Agile Product Ownership (CSPO)**
 - Backlog Management, Sprint Planning, Incremental Delivery
 - User Story Writing, Acceptance Criteria Definition
 - Stakeholder Collaboration, Value-Based Prioritization
- **Execution & Delivery:**
 - Agile/Scrum, Backlog Management, Sprint Planning
 - Stakeholder Management, UAT, Release Governance
 - Risk, Scope, and Change Management
- **SaaS & Platform Expertise:**
 - SaaS Platform Architecture, Multi-product Ecosystems
 - API Strategy, Microservices, Data Workflows, System Integration Design
- **AI & Data Capabilities:**
 - AI-enabled Products, LLM Integration, Document AI
 - Intelligent Automation, Predictive Insights, Data-driven Product Decisions
- **Tools & Technologies:**
 - JIRA, Confluence, Postman, SQL, UNIX

PROFESSIONAL EXPERIENCE

SynergyConnect Data Innovation Pvt. Ltd., Mumbai

Technical Product Owner

Feb 2021 – Mar 2026 | 5 years 1 month

Product Leadership & Strategy

- Own product strategy and roadmap for a multi-product SaaS ecosystem, aligning development with business goals and customer needs.
- Led product discovery and stakeholder workshops to identify high-impact features and define product direction.
- Defined product success metrics and leveraged analytics, feedback, and usage insights to drive roadmap decisions
- Prioritized features and made trade-off decisions balancing customer value, business impact, and engineering feasibility
- Collaborated with leadership to align roadmap with business outcomes and customer success metrics
- Drove product initiatives focused on improving customer experience, platform adoption, and measurable business outcomes

Product Delivery & Execution

- Owned end-to-end delivery of SaaS platform products, improving customer onboarding by 30% and increasing product adoption by 25%, driving higher user engagement
- Translated business requirements into well-defined user stories, acceptance criteria, and scalable product features
- Managed competing priorities, stakeholder expectations, and delivery constraints to ensure timely and high-quality product releases
- Collaborated with engineering, QA, UX, and DevOps teams to ensure alignment between product vision, execution, and customer expectations

Platform & Architecture Impact

- Introduced reusable platform components, reducing development effort and accelerating time-to-market
- Defined API strategy and integrations to enable scalable ecosystem connectivity
- Improved platform stability, system uptime, and release efficiency through structured delivery governance.
- Standardized platform components and workflows, enabling faster product launches and a consistent user experience

AI Product Innovation

- Built and launched an AI-powered Document Intelligence Platform using LLMs, improving document processing efficiency and reducing manual effort across enterprise workflows,
- Enabled faster decision-making through AI-driven insights
- Defined AI use cases, user journeys, and product requirements for intelligent document processing
- Drove AI adoption and intelligent automation across the SaaS platforms, enhancing operational efficiency and decision-making capabilities

Process & Product Improvements

- Established standardized UAT frameworks, documentation practices, and escalation processes
- Leveraged customer feedback and usage insights to drive usability improvements and feature enhancements
- Enabled data-driven decision-making through improved analytics and reporting capabilities.

Key Achievements

- Scaled SaaS platform ecosystem from 4 to 22 products
- Expanded client base from 4 to 26 enterprise clients, increasing platform adoption and business growth
- Improved reporting accuracy by 20%, enabling better business decision-making
- Reduced onboarding time by 30%, accelerating customer time-to-value and improving user experience
- Improved platform scalability and operational efficiency through standardized architecture and reusable components

SCOPE T&M Pvt. Ltd.

Senior Associate Consultant

July 2016 – Oct 2020 | 4 years 3 months

Key Responsibilities

- Supported SaaS and enterprise project delivery through requirement analysis, workflow design, and full functional validation.
- Conducted API, UAT, regression, and end-to-end functional testing.
- Worked directly with business teams and clients to align platform capabilities with operational processes.
- Performed SQL-based data validation and system readiness checks before production releases.

CERTIFICATIONS

- Certified Scrum Product Owner (CSPO) – Scrum Alliance (2026)

LEADERSHIP & MENTORSHIP

- Led cross-functional teams across engineering, QA, UX, DevOps and support
- Mentored team members on product workflows, requirement clarity, and delivery best practices
- Facilitated product design discussions, user journey reviews, and stakeholder alignment

KEY ACHIEVEMENTS & AWARDS

- Aspiring Leader Excellence Award
- Outstanding Leadership in Delivering a Critical Project (07-12-2024)
- Special Contribution Award for Critical Delivery (05-01-2024)
- Recognized for improving platform adaptability, delivery governance and product documentation standards.

EDUCATION

- Bachelor of Engineering (B.E.) – Solapur University | 68%

PERSONAL DETAILS

- Languages: Marathi, English, Hindi
